Become a Surveyor.

CARF surveyors are the cornerstone of the peer-review survey process. Surveyors are professionals in their fields with primary employment at CARF-accredited organizations. Successful surveyor candidates are actively involved in the accreditation process and implementation of CARF standards at their organization.

Benefits for the surveyor and the surveyor's organization:

- An opportunity to network and learn from other professionals while contributing to organizations' business and service delivery practices, performance, and quality of services.
- Development and broadening of leadership skills through surveyor training programs and survey experiences.
- In-house expert on current accreditation standards and processes to assist the organization with its performance improvement and accreditation activities.
- Knowledge sharing of national and international trends and best practices.
- Free access to a multitude of continuing education webinars and complimentary registration for surveyors to most CARF trainings.

Benefits for the field:

- Peer review based on field-responsive standards that ensure quality services.
- The exchange of ideas and practices.

Surveyor qualifications

Candidates for surveyor positions must:

- Be currently employed in a CARF-accredited organization or employed by a governmental entity that works to improve the quality of human services.
- Have at least five years of current experience in the field. The experience must be in the program or service area for which the individual is applying to survey or in an administrative or managerial position.
- Have knowledge of and experience with CARF standards.
- Be available to conduct at least three surveys per calendar year (January 1–December 31), including two surveys within the first six months following initial training.
- Not be employed by or perform any services for a competing accrediting body.

Candidates should also:

- Have excellent interpersonal skills and the ability to work well as a team member.
- Have strong written and verbal communication skills.
- Have good time management skills.
- Have a consultative, rather than inspective, approach to the survey process.
- Have computer skills and access to a laptop for use on surveys.
- Be able and willing to travel to domestic and international survey locations and stay over Saturday night, as needed.

As programs and services evolve, so does our need for applicants with specific areas of experience and expertise.
